-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The restriction requirement of the previous Office Action is withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 6-11, 13, 16, 18, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Newley et al. US 5,660,482 in view of Harrison GB 2,170,279.

Newley discloses a self-lubricating bearing as claimed including a counterface surface in close sliding contact with a bearing liner, the counter face surface having a surface finish and a hardness of less than 1000VPN. Newley does not disclose the specific range of surface finish of "less than 20nm", but does disclose the desirability of a smooth surface (column 2, line 9). Harrison discloses self-lubricating bearings in which the counter surface is desired to be smooth (page 1, line 55), and further discloses surface finishes of less than 20nm (page 2, line 58). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the bearing of Newley such that the counter surface has a surface finish within the range claimed as this is known to improve the bearing characteristics as taught and suggested by Harrison. The bearings of Newley and Harrison are spherical bearings including balls. With respect to claim 8 and 11, it would have been obvious to one of ordinary skill in the art at the time the invention was made to operate the bearing of the prior art in known environments having known parameters, including that as claimed. With respect to claim 9, the method steps presented are fully encompassed by the article combination as set forth in the rejection with respect to claim 1.

Claims 3-5, 14, 15, 17, 20, and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Hannon whose telephone number is (571) 272-7104. The examiner can normally be reached on Monday-Thursday (8:30-7:00).
